

## **Outcome Measures**

### **Primary Outcome measure:**

1. Clinical outcome as measured by modified Rankin Scale (mRS) at 6 months.

### **Secondary Outcome Measures:**

1. Quality of life as measured by SF36 (short questionnaire) at 6 months after SAH.
2. Percentage of subjects reported to have died at 6 months after SAH.
3. Percentage of subjects reported to have DIDs.
4. Percentage of subjects requiring DID rescue therapy, its nature and time of onset.
5. Percentage of subjects requiring intensive care and the duration.
6. Percentage of subjects with sepsis and its treatment.
7. Length of acute hospital stay.
8. Percentage of patients discharged directly home.
